DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,654,981 in view of Bouix et al (6732743). Claims 1-11 of the instant application are read on claims 1-19 of the U.S. Patent No. 6,654,981, except for the steps moving said internal member from the first retracted position to the second projected position, placing a predetermined amount of the cosmetic product upon the internal member and applying the cosmetic product to the skin of the user. Bouix et al discloses a method of applying a cosmetic product using a cosmetic applicator by loading the cosmetic material onto the applicator and contacting the applicator tip on a body of the user (col. 4, lines 43-47). It would have been obvious to one having an ordinary skill in the art at

the time the invention was made to employ the above steps as taught by Bouix et al for the purpose of delivering cosmetic material to the user and it would also have been an obvious matter of choice to move said internal member from the first retracted position to the second projected position, since such step involves in a mere choice of the known element.

The drawings filed 08/18/03 have been approved by the Examiner.
